

THE BENEFITS OF TREES

HEALTH

Trees filter airborne pollutants and reduce the conditions that cause asthma and other respiratory problems.

Children living in greener neighborhoods tend to be physically more active and less likely to be overweight.

ENVIRONMENTAL

Trees provide shade, wind protection and reduce stormwater runoff and erosion, making our neighborhoods both appealing and resilient.

Increased tree populations decrease carbon emissions and improve air, soil, and water quality.

COMMUNITY

Trees and green spaces help reduce crime, boost neighborhood pride, and foster connectivity.

Natural landscapes abundant with trees help to reduce graffiti, vandalism, and littering in outdoor spaces.

ECONOMIC

Trees reduce heating and cooling costs for residents.

Trees increase property values for homeowners and profits for local businesses.
